About Us

Homes

- Since 2001 we have cared for 30 HIV+ children who were placed in our 4 Foster Care Homes. We have cared for them from babies to adults. We currently have 4 adolescents who we are still caring for.

Children's Medical & Palliative Step-Down Facility/Hospice

- Since 2009 we established a 16 Bed Children's Step-Down Facility/Hospice, to serve our patients who are referred to us from Public Hospitals for further medical, palliative, rehabilitative and psychosocial care.

Home-Based Care

- Since 2009 we have had a Home- Based Care program to care for our patients at home once they are discharged from our facility.

Referral Pathway

- Our patients are referred to us from all public and private Hospitals, in Gauteng as well as other Provinces.
- Most referrals are Doctor to Doctor
- Social Services can also refer if there are high medical needs
- After discharge we then admit the child to our Home-Based Care

- Isolation services

COMING SOON

Vision of the New Children's Sub-Acute Facility.

Is to provide excellent comprehensive care through our holistic and interdisciplinary team approach, to all children and adolescents who require further Medical, Physical and Aqua Rehabilitation Services.

WHY US

The few facilities that take in paediatric patients in Gauteng are not specifically set up for Paediatrics only and have a mixed model with paediatric beds as part of their total bed allocation. Neither of these facilities deal with the complex medical needs of paediatrics and adolescents, therefore, with our twenty-three years' experience we will be well placed to continue our service in the private sector.

WHO CAN REFER TO US

- Medical aids
- Doctor
- Raod Accident Fund
- Insurers - Local and International
- Private paying parents

Further details about the event will be sent to you soon.
